Herglotz, H. K.
SEMI-QUANTITATIVE ESTIMATION OF THE PERFECTION OF SINGLE SILICON CRYSTALS. [1962] 7p. 6 refs.
Order from SLA $1.10 63-10161

Trans. of Acta Physica Austriaca, 1962, v. 15, no. 1/2, p. 57-63.

DESCRIPTORS: Quantitative anlaysis, *Silicon, Crystals, *Single crystals, Crystal structure.

Counting etching pits and a previously reported X-ray method /1/ were compared in relation to the ability to characterize the perfection of single silicon crystals. The effect of crystal perfection on the life of minority carriers in single silicon crystals was also determined and agreement with earlier measurements, obtained in a different way, was observed. Kaischew, R.
CONTRIBUTION TO THE THEORY OF THE SPEED OF CRYSTALLIZATION (Zur Theorie der Kristallisationsgeschwindigkeit). [1962] [17]p. (foreign text included) 9 refs.
Order from SLA $1.60

62-18118

Trans. of Acta Physica (Hungary) 1957, v. 8, no. 1/2, p. 75-81.

DESCRIPTORS: *Crystallization, Velocity, Dynamics, Theory, Chemical bonds, Nucleation.

Using our own bases of calculation and the ones introduced by Stranski, also applying a simplified calculation scheme according to Becker and Döring, the linear rate of the growth of crystals is determined for flawless crystals. At a small supersaturation already the formation of each two dimensional nucleus leads to the addition of a new layer of atoms upon the crystal surface. (Author)
